

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. Practical Bibliographies

SOME GREAT AMERICAN NEWSPAPER EDITORS

By MARGARET ELY

NOTE

The bibliographies of this series in the field of journalism were prepared as graduation requirements from the Library School of the University of Wisconsin. They were compiled at the suggestion of, and in cooperation with Willard G. Bleyer, professor of journalism in the University. They have been tested by constant use in manuscript form in the School of Journalism for two years, and were found so useful that they are issued in this series to meet the demands for bibliographies in a field where none existed. Each bibliography was revised and brought up to date by its compiler before publication, the revision being made for the needs that developed during the two years of use. Almost all of the entries were verified in the libraries of the Wisconsin Historical Society and the University of Wisconsin, though some entries of importance, listed in reliable sources, are included without verification.

INTRODUCTION

As a supplement to the previous bibliography, "Masters of American Journalism," this bibliography lists material concerning other representative journalists in America. The editors chosen were active in various fields. Carl Schurz, the patriot and orator, and Whitelaw Reid, the diplomat, are widely known in other than the editorial field. Henry Grady was both orator and editor, while George W. Childs gained a reputation as a philanthropist in the field of journalism. Nathan Hale and Thurlow Weed confined their efforts mainly to journalism, although the latter was prominent as a politician in his day. Samuel Bowles is perhaps the most representative of all as an editor and was chosen by Colonel Harvey in his Bromley Lecture at Yale University as one example of a master journalist.

Since the material available on most of these editors is small, there has been little exclusion except in the case of Schurz and Reid, where some attempt at selection has been made.

Newspaper articles have not been indexed but two issues will be found of especial value. The anniversary number of the Philadelphia Public Ledger (daily) for March 25, 1916, has important material about Childs and the Springfield Republican (weekly) for December 8, 1888, published at the time of the removal to the new building, contains matter of interest about Bowles.

Bibliographical information is listed whenever readily available, but is by no means exhaustive. In cases where more than one edition exists, the most available has been cited.

The abbreviations Por. and o. p. have been used to denote portrait and out of print.
